

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS  
AND DOMESTIC ANIMALS**

**CAUTION**

If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. Keep away from children, pets, and domestic animals. Do not contaminate feed and food stuffs. Use only in rodent-infested areas where exposure to agricultural crops or commodities will not occur. Keep away from children, pets, and domestic animals. Wash thoroughly with soap and water after handling and before eating or smoking. Clean clothing should be used daily.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish, birds, and other wildlife. Bait exposed to soil surfaces may be hazardous to birds and other wildlife. Do not apply directly to lakes, streams, or ponds.

**DIRECTIONS FOR USE**

It is a violation of State and Federal laws to use this product inconsistent with its labeling.

**FOR DISTRIBUTION AND USE ONLY IN CALIFORNIA.**

**USE RESTRICTIONS**

For use against NORWAY RATS, ROOF RATS, HOUSE MICE, GROUND SQUIRRELS, CHIPMUNKS, MUSKRATS, MEADOW MICE, and WOOD RATS.

**IMPORTANT**

An uninterrupted supply of bait should be maintained as long as any bait is taken, which may be 1 to 4 weeks. Treated baits should be placed in locations not accessible to children, pets, wildlife, and domestic animals, or in tamper-resistant bait boxes.

Initial acceptance may not occur until animals become accustomed to the bait station. Bait stations should have entrance holes large enough to admit target species, but not larger animals. Secure bait stations to prevent overturning. Maintain bait supply for at least 15 days. Continue baiting until all signs of feeding have been stopped. Bait placements should be checked daily; replace consumed, contaminated, or spoiled baits.

Where a continuous source of infestation is present permanent bait stations should be established and the bait replenished as needed. All poison baits must be picked up and disposed of after rodent activity has stopped.

Keep this product in a closed container to maintain acceptability.

**RODENT BAIT**

**DIPHACINONE**

TREATED GRAIN (0.005%)

Active Ingredients: Diphacinone

2-diphenylacetyl-1,

3-indandione

**CAUTION**

**STATEMENT OF PRACTICAL TREATMENT**

**IF SWALLOWED: CALL A PHYSICIAN OR POISON CONTROL CENTER IMMEDIATELY.** Drink 1 or 2 glasses of water and induce vomiting by touching back of throat. Do not induce vomiting or give anything by mouth to an unconscious person.

**NOTE TO PHYSICIAN**

Intramuscular and oral administration of Vitamin K, combined with blood transfusions is indicated as in the case of hemorrhage caused by overdoses of bis-hydroxycoumarin (Dicumarol).

NET CONTENTS 50 lbs.

**BAITING: NORWAY RATS, *Rattus norvegicus*, and  
ROOF RATS, *Rattus rattus***

Place 4 to 16 ounces of bait in bait box or shallow container, preferably in protected feeder stations. Place bait stations in dry locations such as in concealed places, in corners, along walls where rats feed, drink, or frequent. For roof rats, place bait at ground floor and top floor, or attic levels. For Norway rats, put bait at or near ground level and at burrows and harborages.

**BAITING: HOUSE MICE, *Mus musculus***

Place 2 to 4 ounces of bait in bait box or shallow container, preferably in protected feeder stations. Place bait stations at 8 to 12 foot intervals in dry locations such as in concealed places, in corners, or along walls where house mice feed, drink, or frequent.

**BAITING: GROUND SQUIRRELS, *Spermophilus  
beecheyi*, *S. beedingi***

Bait boxes: Place 1 to 5 pounds of bait in a covered bait box in areas frequented by ground squirrels (near runways, burrows, etc.).

**BAITING: JACKRABBITS (Black-tailed hare),  
*Lepus californicus***

Place 1 to 5 pounds of bait in a covered self-dispensing feeder or nursery flat in areas frequented by rabbits (near runways, resting or feeding areas). It may be necessary to move feeders to new locations to achieve bait acceptance. Carcasses of poisoned rabbits should be picked up and disposed of by deep burying or burning.

**BAITING: MEADOW MICE *Microtus californicus*,  
*M. montanus*.**

Lightly scatter tablespoon amounts (1/4 to 1/2 ounce) of bait near active burrows or in runways. Repeat treatment every other day for 3 treatments.

**BAITING: WOOD RATS, *Neotoma* spp.**

Place 4 to 16 ounces of bait in an open bait box or shallow container. Bait stations should be located near existing wood rat runways or dens, and generally spaced no further than 100 feet apart.

**STORAGE AND DISPOSAL**

Store in a locked enclosure (in a properly posted area) in such a manner so as not to present a hazard to persons, animals, food, feed, crops, or property. Do not contaminate water, food, or feed by storage or disposal. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Completely empty bag into application equipment. Then, dispose of empty bag in a sanitary landfill or by incineration, or (if allowed by State or local authorities) by burning. If burned, stay out of smoke.

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
